

# UDAY KIRAN TELLA

## FULL STACK DEVELOPER

Bengaluru, India | +91 70139 22278 | tellaudaykirann@gmail.com | LinkedIn | GitHub

### PROFESSIONAL SUMMARY

MERN Stack Developer with 1+ years of experience building responsive front-end interfaces and secure back-end APIs using JavaScript, React.js, Node.js, and Express.js. Skilled in database integration (MongoDB, PostgreSQL, MySQL), RESTful API design, authentication/authorization, Git-based version control, and CI/CD-driven deployment. Comfortable working across the full stack in Agile, cross-functional teams, with a strong record of delivering production-grade CRM, E-Commerce, Healthcare, and HR applications and a continued interest in cloud platforms and containerization.

### TECHNICAL SKILLS

- Front-End: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS, React Hooks
- Back-End: Node.js, Express.js, REST APIs, JWT Authentication, OAuth 2.0, RBAC, MVC Architecture, Java
- Databases: MongoDB, PostgreSQL, MySQL, Supabase (SQL & NoSQL)
- Tools & Deployment: Git, GitHub, Docker, CI/CD Pipelines, Cloudflare, Vercel, Netlify
- Concepts: OOPS, API Integration, System Design, Agile/Scrum, Performance Optimization

### PROFESSIONAL EXPERIENCE

#### Full Stack Developer – Associate Software Developer | Zihwa Insights, Bengaluru Dec 2025 – Present

- Developed and maintained full-stack web applications using MongoDB, Express.js, React.js, and Node.js (MERN stack) across multiple production projects.
- Designed and built secure RESTful APIs with Node.js and Express.js, reducing API response time by 20%.
- Built a modular CRM platform with JWT authentication, role-based access control (RBAC), and Supabase integration.
- Delivered a production-grade E-Commerce platform covering product management, cart, and order workflows.
- Built reusable React.js components and custom hooks, improving frontend development productivity by 30%.
- Collaborated with designers, product managers, and QA in Agile sprints; used Docker, Git, and CI/CD pipelines to streamline deployment.

#### Front-End Developer | Ve-Lyra Labs, Bengaluru June 2025 – Dec 2025

- Built responsive React.js healthcare dashboards integrated with backend REST APIs.
- Developed reusable UI components and optimized performance using lazy loading, memoization, and code splitting.
- Implemented role-based interfaces for doctors, patients, and administrators; collaborated with backend and QA teams through the SDLC.

### KEY PROJECTS

#### Pars Optima – CRM Platform

React.js, Node.js, Express.js, MongoDB, Supabase, JWT, RBAC

- Designed and built a modular CRM platform covering customer management, lead tracking, deal pipelines, and operational dashboards for multiple business teams.
- Implemented secure authentication and multi-role authorization using JWT and RBAC, restricting data access by user role across the platform.
- Built and optimized scalable REST APIs and MongoDB/Supabase queries to improve data retrieval performance and reduce page load times.
- Developed reusable React.js dashboard components for analytics and reporting, giving business users real-time visibility into leads and customers.

#### Stalks N Spice – Customer E-Commerce Platform

React.js, Node.js, Next.js, JavaScript, Supabase

- Built a full customer-facing e-commerce platform covering product discovery, category filtering, shopping cart, checkout, and order tracking.

- Implemented seller-side workflows for product listing, inventory synchronization, and order management, connecting seller and customer experiences end-to-end.
- Optimized API consumption and implemented responsive UI patterns, ensuring a consistent shopping experience across desktop and mobile devices.
- Used Next.js server-side rendering to improve initial load performance and search engine visibility for product pages.

### **Distribution Intelligence Network – Seller Management Portal**

*React.js, Node.js, Express.js, MongoDB*

- Built a seller dashboard supporting inventory management, product creation, order monitoring, and day-to-day business operations.
- Implemented role-based access control and secure authentication so sellers and administrators have appropriately scoped permissions.
- Designed product lifecycle management workflows (creation, updates, stock tracking) with real-time data handling for accurate inventory status.
- Built centralized reporting tools that streamlined seller operations and reduced manual tracking effort.

### **HR Management System**

*React.js, Node.js, Next.js, JavaScript, TypeScript, PostgreSQL, Supabase*

- Developed end-to-end HR workflows including employee onboarding, attendance tracking, leave management, and payroll operations.
- Designed relational database structures in PostgreSQL for employee records, leave balances, and payroll data, ensuring data consistency.
- Built secure, role-based dashboards for HR administrators and employees, each surfacing only relevant actions and information.
- Automated previously manual HR processes into centralized digital workflows, reducing administrative overhead.

### **AACP Infra – Corporate Website**

*Next.js, React.js, Server-Side Rendering (SSR), SEO, JavaScript*

- Developed and deployed a responsive corporate website using Next.js and React.js with Server-Side Rendering for faster initial page loads.
- Implemented SEO best practices (meta tags, semantic structure, sitemap) to improve organic search visibility.
- Optimized performance and accessibility across devices, delivering a modern, scalable web presence aligned with corporate branding.

## **EDUCATION**

---

### **Bachelor of Technology (B.Tech), Electronics and Communication Engineering**

Bapatla Engineering College | 2019 – 2023 | CGPA: 8.14 / 10.0

## **CERTIFICATIONS**

---

- Full Stack Java Development – MERN & Java Technologies
- Advanced SQL – HackerRank
- Git and GitHub Bootcamp – Let's Upgrade
- Java Programming – Brilliant Institute

## **ACHIEVEMENTS**

---

- Event Organizer – BECTAGON 2K23 National Technical Fest with 500+ participants.
- Second Prize – Engineers Day Technical Quiz Competition.
- Recognized for active participation in technical events, community initiatives, and leadership activities.

## **CORE COMPETENCIES**

---

Full Stack Development • MERN Stack Development • REST API Development • Authentication & Authorization • Database Design • Responsive Web Development • Software Architecture
